Re-Energizer Break

I am taking a little break (an extended weekend) and heading for the sun with my daughter. The studio will **not** be open from Thursday March 8 to Tuesday, March 13th.

My big plan is to enjoy my company, consume slushy drinks, and have lots of sand between my toes!

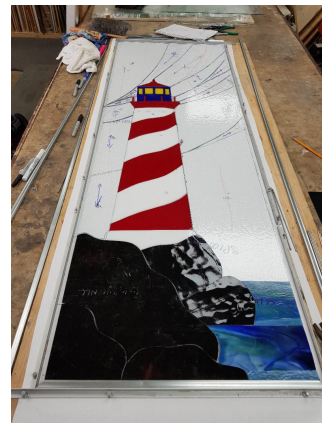

In The Studio

This is the latest project on the table. I am making a light house window for a front door in a private home. This requires an insulated tempered glass unit. I am posting my progress on Facebook every couple of days. Check it out and follow along.

(I appreciate the "Like" , if you feel so inclined!)

[Custom Work](#)

Finally Received an Order!

The order I placed in January finally arrived, all-be-it just 16 of the 36 glass colours I requested.

On a brighter note, I seem to be topped up on the supply side.

I should have everything unpacked by Wednesday and I will be away right after that. If you plan on

coming in on Wednesday morning, please call ahead, I have a couple of site visits early in the day. 902-876-5167. If I am away, your call will be forwarded to my mobile.

Project Club Every Friday!

Be part of our studio. Sign up for six afternoons – Fridays, 1 – 4pm – to work on your own projects (Stained Glass, Fusing, Mosaics...whatever!) in the company of other glass enthusiasts. Enjoy shared camaraderie, knowledge, skills and humour (such as it is at the end of a work week).

Keith Hall Windows

Anyone who has been in the studio in the last month has felt the presence of the Keith Hall (Alexander Keith's Residence on Hollis St) windows. They are huge and take up a lot of space! The reproduction frames are beautiful and all the glass has been installed. Just have to go through the final glass cleaning and deliver.

Beginner Stained Glass Course

All done! Graduates of the January 2018 Beginner Stained Glass Course! They were all really happy with their final outcome. Well done gang!

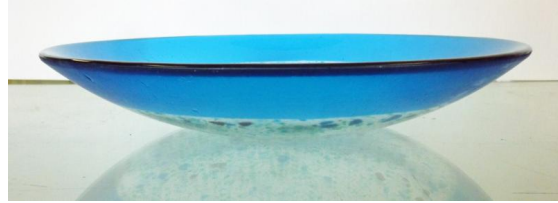

Next course starts March 17. It is full! So if you want to join the ranks of this elite group, our next course starts Saturday, June 2.

[Beginner Information](#)

Fusing 101

You will have a blast in our comprehensive Fusing 101 Course. You will complete 6 different projects tackling everything from programing the right firing schedule, to construction and finishing work. Also you will receive a copy of my 85 page book exclusively for my Fusing 101 students only!

Next class starts May 5! 2/6 spots are reserved already! Call or [email](#) your interest now.

Small Repairs

Some small repairs and renovations are worth it! Bring in your item and Cranberry will give you an honest opinion and a reliable time frame and quote. We have seen, family heirlooms, suncatchers, clock faces, countless stained glass boxes, terrariums, lamp shades, Christmas decorations, vases, bird feeders...we never know what will walk through our door, but we are always happy to help you.

[Repairs](#)

Bigger Repairs

Sometimes the repair is bigger than a bread-box. For convenience, you can send us photos and pairing communication of your concerns by email or on the phone. We can often give a quick ballpark quote or at least determine if worthy of delving deeper or at least seeing the item in real life. On site appointments can be arranged and pick-up service with the Cran Van can be coordinated if required.

Stained Glass News. Issue #129

I just received 50 copies of the Stained Glass News, issue #129! I have not had them to give out for a long time. Drop into the studio and get your free copy while supplies last or \$2ea for postage in Canada if you can't make it in.

[Let me know if you want one shipped out.](#)
